

Crystal Quick Reference

Calcite - Caribbean Blue

Calcite Caribbean Blue

This crystal was first discovered in 2019 in Pakistan. It is a combination of light blue calcite and light brown or white Aragonite. This crystal has the properties of each.

It stimulates and helps to develop all psychic abilities. It is wonderful for working with the Throat, Third Eye, and Crown chakras.

It aids in astral projection as well as communication with higher beings and divine beings. It can also help with lucid dreaming.

This is also an excellent crystal for communication.

It is a powerful crystal for relieving stress and anxiety. This crystal is also excellent for working through and dealing with past trauma since it helps the user to remain calm when revisiting painful experiences.

Caribbean Blue Calcite also aids with meditation. It can help you look within yourself.

This crystal works wonderfully with Amethyst, Angelite, Auralite 23, Fluorite, Moonstone, Prasiolite, Selenite, Super 7, and many others that enhance psychic abilities. It will also work well with Rhodonite, Rhyolite, and Rhodochrosite.

Chakras: Throat, Third Eye, Crown
