

Crystal Quick Reference

Fluorite

Fluorite

Chemical Formula CaF_2

Fluorite is a crystal of mental well being, of emotion and psychic development. It comes in many different colors with green, blue and purple being the most common. Shades range from very light to very dark. Other colors include pink, yellow, red, black, colorless, magenta and others.

The energy of fluorite is very stabilizing and can bring order to chaos on the physical, mental, emotional, and spiritual levels.

One of the greatest strengths of this crystal is that it can help you to be impartial, especially in situations where you need to see both sides of things and be able to act objectively.

It is a stone of the mind and intellect. It helps with concentration and reasoning, helps to balance positive and negative thoughts, helps to see both reality and the truth behind illusion.

It helps to bring balance in relationship. It brings a stabilizing energy into the situation which can help relationships and personal interaction.

It is an excellent crystal for purification, cleansing and elimination of everything that is in disorder. It has been used to help with colds, flue, staph and strep infections, infectious cankers, herpes, ulcers and similar infections as well as highly infectious diseases.

Special Color Properties

Blue: Helps to organize thoughts, put things in sequential order. Good for record keeping tasks. Calming energy. Assists in communication skills.
