

Crystal Quick Reference

Kyanite - Mystic

Mystic Kyanite is a form of Black Kyanite that has been treated with Titanium vapor. This gives the black kyanite a multi-hued or blue appear.

Mystic Kyanite has all of the properties of Black Kyatnite as well as that of Titanium.

This fusion has produced a synergistic effect strengthening the properties of both crystals.

Mystic Kyanite is excellent for working with mental blocks. It is also a super powerful crystal for dissolving blocks in the energetic bodies as well as the physical bodies.

The ability of Black Kyanite to help delve into the subconscious is greatly enhanced by the addition of Titanium.

It also aids in astral projection. It is a great aid in remove viewing and mental projection not only in the physical realms but other realms.

Mystic Kyanite will help to expand your consciousness and awareness. Communication with higher beings may become much stronger and easier.

To help break up and dissolve energetic blockages in the physical, emotional, mental, or spiritual bodies, drink an indirect-energy infusion of water (place the crystal next to a container of water for 15 to 30 minutes).
