

Crystal Quick Reference

Rainbow Calsilica

This is a manmade crystal combining calcium carbonate (calcite), silicates, pigments and resin. Silicates are a combination of Silicon and Oxygen (SiO₄) and the atoms are arranged in a tetrahedral (pyramid) shape. Quartz is one of the most famous silicates. Quartz is an excellent amplifier and general all purpose crystal. The calcium carbonate may come from fossilized shells compressed over eons.

With quartz and calcium carbonate as a base, the true power of the crystal comes from the colors.

Each color has different properties.

This crystal will help working with all chakras.

The colors plus the quartz and calcium carbonate will help to cleanse the aura.

The red will help to balance and activate the root chakra which can help may help with sense of self issues, self esteem issue, reaction to traumatic experiences where you might normally flee, sexual issue, etc.

The orange, gold, mustard, salmon colors work with the sacral chakra. This chakra is linked to the digestive system, liver, spleen, kidneys, pancreas, etc. If the body can process nutrition more effectively it can help increase vital energies.

The yellow tones work well with the solar plexus chakra which may help with interpersonal interactions (friendships and interactions with other people).

The greens and pinks link with the heart chakra - our emotional center. This chakra helps with romantic relationships and feelings, feelings of love towards yourself and other beings, emotional issues and past trauma.

The blues work with the throat chakra which governs communication and may
