

Crystal Quick Reference

Simbircite

Simbircite

Simbircite is an extremely rare crystal. It comes from Simbirsk, Russia. This crystal was formed over 80 million years ago during the Cretaceous age. It is a combination of calcite, marl, pyrite, fragments of ammonites and other ancient life forms. The gold lines are pyrite.

It absorbs negative energy.

It is a mental crystal. It helps to ease fear. It also calms the mind. It can strengthen memory. It helps to promote emotional balance. It can help you to deal with the fight/flight response.

Excellent crystal for protection.

It helps to balance, stimulate and active the root chakra, sacral chakra and solar plexus chakra. As these chakras become more active it can greatly increase your physical energy.

This crystal may hold information from the Cretaceous Age and the the subsequent geological ages ... a record keeper.

Very useful in shamanic workings. Placing the crystal on the 3rd eye may give glimpses into the ancient past of this planet. If worn when you begin an astral traveling session it can ward off "nether" entities (beings from Ne'thar'ia, often not friendly to beings from our plane) by emitting a golden ray at an inverse frequency to their natural frequency.

Excellent for healing to repairs tears in the heart chakra caused by physical assault, sexual assault, emotional assault. This crystal can work through time to send emotional healing back to the time when the assault occurred. When combined with Reiki and the mental/emotional symbol, Holy Fire Reiki, Holy Fire Karuna Reiki (r), Kaleidoscopic Reiki, multiple Rainbow Reiki
